SUMMARY

Full Stack Developer with expertise in MERN Stack and React Native. Experienced in web development, customer support, and software engineering concepts. Skilled in building responsive applications, REST APIs, and modern UI designs.

EDUCATION

University of Central Punjab, Lahore

Oct 2023 – Oct 2027

- Bachelor of Science in Software Engineering (BSSE)
- 6th Semester | CGPA: 3.3

Punjab College, Lahore

Feb 2020 – Apr 2022

- Intermediate in Computer Science (ICS)
- Marks: 906 / 1100

SKILLS

Technical Skills:

- MERN Stack Development (MongoDB, Express.js, React.js, Node.js)
- React Native
- JavaScript, Java, C++, C
- HTML, Tailwind CSS
- MySQL & MongoDB
- REST API Development
- WordPress Development
- Data Structures & Algorithms
- Object-Oriented Programming (OOP)
- UML Diagrams & Software Architecture

Interpersonal Skills:

- Communication Skills
- Team Collaboration
- Problem Solving
- Time Management
- Leadership & Coordination

WORK EXPERIENCE

Next Level Transportation (CSR)

Dec 2022 – May 2023

- Assisted drivers and managed dispatch communication.
- Coordinated operations for timely deliveries and support.

eBay Dropshipping – Ongoing

Feb 2026 – May 2026

- Managing product research, listings, pricing strategies, and order fulfillment.
- Handling customer support and optimizing store performance.

PROJECTS

Library Management System (Backend Development)

Developed the backend of a Library Management system using the MERN Stack.

- Implemented REST APIs
- Added authentication and secure data handling using Node.js and Express.js.
- Integrated MongoDB database for storing book information, student information.

Multiple Frontend Development using React and React Native (Ongoing)

- Currently developing the frontend using React.js.
- Building responsive and user-friendly interfaces.
- Using reusable React components and modern UI design practices.
- React Native UI

AI Models Portal (Machine Learning & Web Development)

Developed an AI-powered web application using **Python, Flask, Scikit-learn, and Hugging Face Transformers.**

- Implemented machine learning and deep learning models including DBSCAN, K-Means, CNN Image Classification, Sentiment Analysis, Question Answering, Text Generation, Translation, Named Entity Recognition (NER), and Apriori Algorithm.
- Built Flask-based backend to process datasets, images, and text inputs while integrating pre-trained AI models for real-time predictions.
- Developed an interactive and user-friendly interface for uploading data, running AI models, and visualizing results with charts and analytics.
- Integrated audio input/output support and data visualization features to enhance the user experience.
